

ENVIRONMENTAL AUDITING, MONITORING AND COMPLIANCE

Capability Statement

Ecology and Heritage Partners are experts in the effective management and implementation of the environmental auditing, monitoring and compliance requirements of a project. As experienced leaders in the smooth and timely facilitation of environmental approvals, we offer a distinct advantage when it comes to minimising risk and streamlining compliance of approval conditions.

Our large team of specialists are at the forefront of their fields. In addition, we have exceptional understanding of relevant legislation and assessment requirements, and excellent relationships with Commonwealth and state regulatory bodies.

We understand safety is a high priority on a site. All field staff are proficient at operating in high risk environments and an essential range of inductions and certifications is maintained.

Ecology and Heritage Partners engage with clients from a diverse range of industries, including renewable energy, mining, linear infrastructure (road, rail, utilities), water and urban development.

Whether the project is in the construction, operation or decommissioning phase, we recognise the importance of managing project schedules and budgets, and work with integrity when assisting proponents to comply with approval conditions.

Capabilities

Ecology

- › Aquatic flora and fauna assessments
- › Artificial habitat design and fauna crossing structures (eg. nest boxes, fauna crossings, underpasses)
- › Baseline flora and fauna surveys
- › Compliance auditing
- › Community engagement and stakeholder consultation
- › Construction Environmental Management Plans (CEMPs)
- › Delivery of biodiversity and vegetation offsets
- › Environmental planning assistance
- › Fauna awareness training and inductions
- › Land management and restoration
- › Pest Plant and Animal Management Plans

- › Species Management Plans
- › Translocation of significant species (eg. fauna spotter-catcher services)
- › Water quality monitoring

Heritage

- › Archaeological sub-surface testing, excavation and salvage
- › Compliance audits
- › Cultural heritage site induction
- › Oversight of heritage management plan implementation
- › Reburial of cultural heritage items
- › Stakeholder and Traditional Owner consultation

Practical outcomes. Trusted expertise.

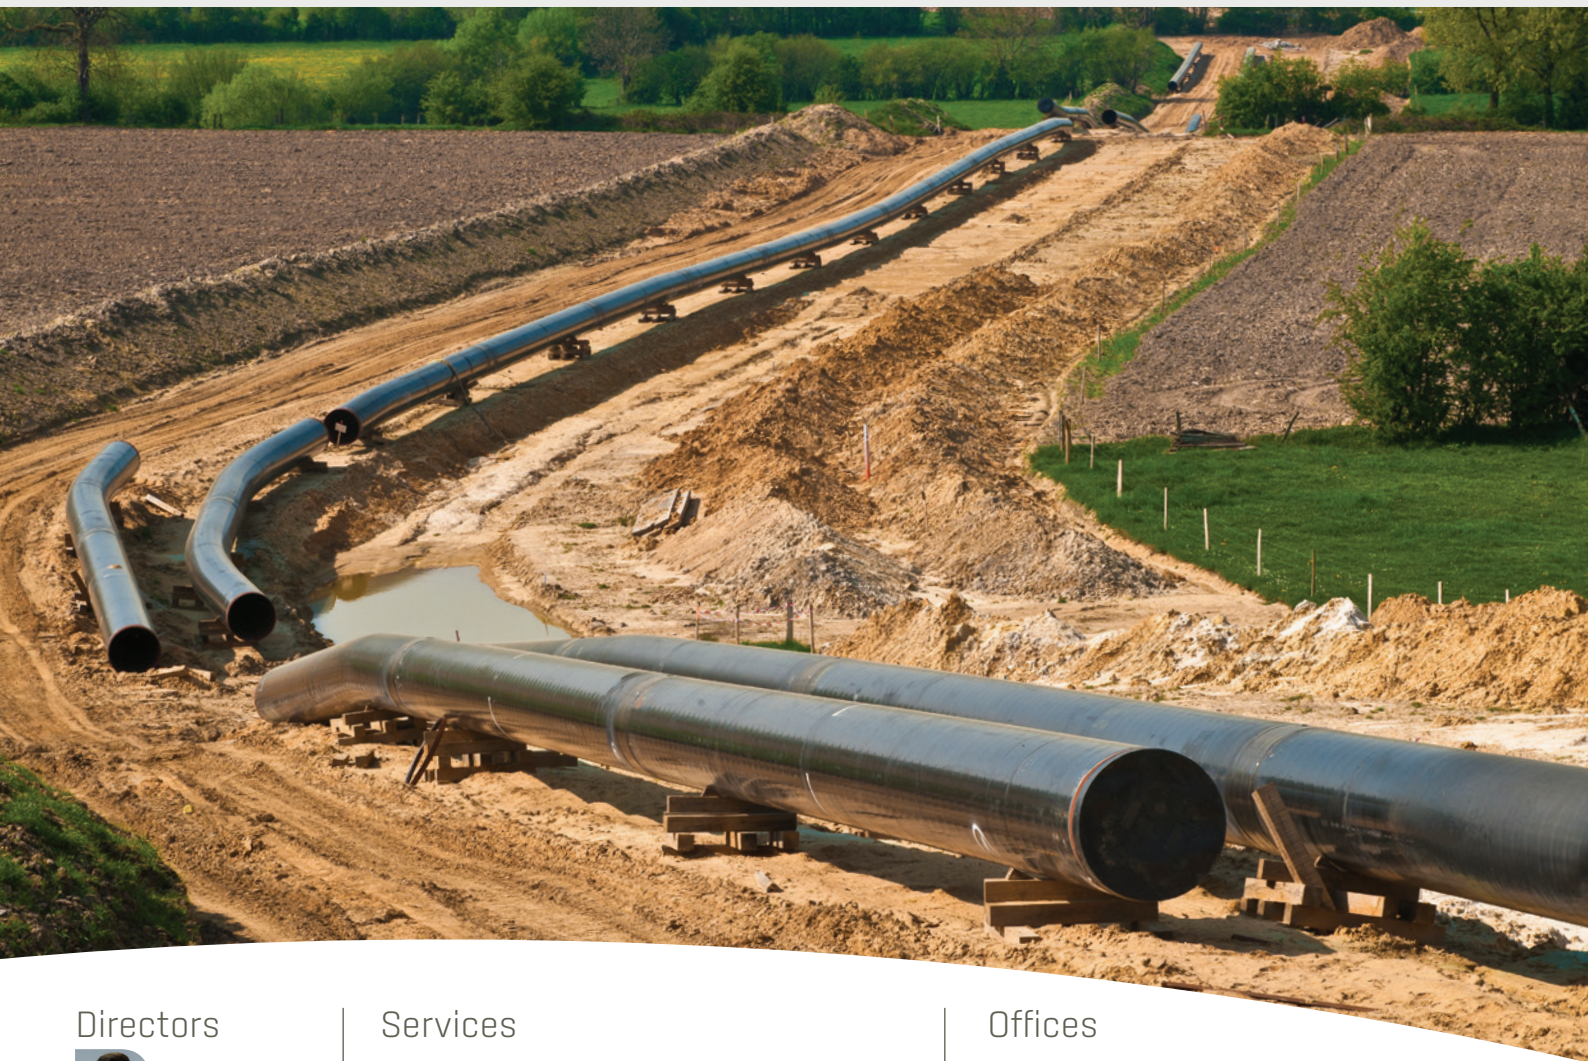

Our priorities

- › Close working relationships with Commonwealth and state regulators
- › Comprehensive Occupational Health and Safety, and Quality and Environmental Management Systems
- › Excellent project management skills
- › High technical competency
- › In-depth knowledge of relevant legislation and its practical application
- › Independent and objective advice
- › Minimising project risks
- › Responsiveness to client requests
- › Timely project completion

Projects

- › **Environment Protection and Biodiversity Conservation Act 1966 (EPBC Act) Compliance Assessments, Various:** Commonwealth Department of the Environment and Energy
- › **Googong Township, Environmental Representative (NSW):** Googong Township
- › **Level Crossing Removals (Vic):** Level Crossing Removal Authority
- › **Millenium Mine Offset Monitoring, BioCondition Assessments, Baseline Fauna Assessments (QLD):** Peabody Energy
- › **Victorian Desalination Plant, Project Commissioning and Construction (Vic):** Thiess
- › **Williamsdale Solar Farm, Weed Management (ACT):** Green Switch Australia
- › **Waterloo Wind Farm, Managing Compliance Requirements (SA):** Vestas Asia Pacific
